summarise_decomposition_routes
<i>Summarize Decomposition Diagnostic Routes</i>

Description

Computes fold-level shares and route-level summaries from variant metrics produced by ‘run_decomposition_route_cv()’

Usage

```
summarise_decomposition_routes(variant_metrics = NULL)
```

Arguments

variant_metrics
Data frame with route, fold, variant, status, and loss columns.

Value

Named list with ‘data_fold_shares’ and ‘data_route_summary’.

Index
