validate_trait_review_decisions
Validate Trait Review Decisions

Description

Validates review schema, human approval, candidate coverage, selectors, and correction-rule conflicts against current trait records.

Usage

```
validate_trait_review_decisions(  
  data_trait_review_decisions,  
  data_trait_records,  
  data_trait_review_candidates  
)
```

Arguments

`data_trait_review_decisions`
Decision data loaded by `[load_trait_review_decisions()]`.

`data_trait_records`
Current trait records for the review stage.

`data_trait_review_candidates`
Current candidates from `[build_trait_review_candidates()]`.

Value

A tibble containing validated review decisions.
