apply_trait_source_scale_rules
Apply Trait Source Scale Rules

Description

Applies approved whole-source scaling rules once and records each changed trait value with its stable VegVault identifiers.

Usage

```
apply_trait_source_scale_rules(  
  data_trait_records,  
  data_trait_source_scale_rules  
)
```

Arguments

`data_trait_records`
Untouched trait records containing source and record identifiers.

`data_trait_source_scale_rules`
Validated source-scale rules.

Value

A named list with source-scaled records and rule- and record-level audits.
