build_sjsdm_artifact_provenance
Build sjSDM Artifact Provenance

Description

Constructs the common one-row provenance contract for native-v2 cross-validation artifacts.

Usage

```
build_sjsdm_artifact_provenance(  
  pipeline_id = NULL,  
  configuration_profile = NULL,  
  created_at = base::Sys.time(),  
  stable_provenance = base::list()  
)
```

Arguments

pipeline_id Pipeline identifier.
configuration_profile
 Active configuration profile.
created_at Finite artifact creation time.
stable_provenance
 Optional named list of stable scientific fields.

Value

One-row provenance tibble.
