combine_sjsdm_selected_fold_artifacts
<i>Combine Selected sjSDM Fold Artifacts</i>

Description

Combines, deterministically orders, and validates complete out-of-fold coverage across selected-candidate fold results.

Usage

```
combine_sjsdm_selected_fold_artifacts(  
  list_fold_results = NULL,  
  data_assignments = NULL,  
  taxon_names = NULL  
)
```

Arguments

list_fold_results	List of fold results from [run_sjsdm_selected_fold()] or the cached builder.
data_assignments	Location-level fold assignment table used to derive expected coverage.
taxon_names	Full ordered response-taxon names.

Value

Named list with combined predictions and fold diagnostics.
