| <i>Compute the Exact Spatial MEM Basis Engine Result</i> |

---

## Description

Internal exact-strategy helper for [compute\_spatial\_mev\_basis()].

## Usage

```
.compute_exact_spatial_mev_basis(mat_coords, exact_function)
```

## Arguments

`mat_coords`      Numeric projected-coordinate matrix.  
`exact_function`   Exact Moran-eigenvector construction function.

## Value

Named list containing the complete MEV matrix, empty fast-basis state, engine method, and projection method.
