normalise_coordinates	<i>Normalise Coordinates</i>
-----------------------	------------------------------

Description

Converts a coordinate table to a standard tibble with explicit dataset names and coordinate columns.

Usage

```
normalise_coordinates(data_coordinates = NULL)
```

Arguments

`data_coordinates`
A data frame with 'coord_long' and 'coord_lat' columns. Dataset names may be stored either in a 'dataset_name' column or in row names.

Value

A tibble with 'dataset_name', 'coord_long', and 'coord_lat' columns.
