.prepare_sjsdm_response	
	<i>Prepare the sjSDM Response and Error Family</i>

Description

Internal helper that preserves the response preparation performed by ‘fit_jsdm_model()’.

Usage

```
.prepare_sjsdm_response(  
  data_community = NULL,  
  error_family = c("gaussian", "binomial")  
)
```

Arguments

`data_community` Community response matrix.
`error_family` Selected error-family name.

Value

Named list containing the prepared community matrix and family.
