select_decomposition_route_samples
<i>Get Decomposition Route Sample IDs</i>

Description

Selects sample IDs for one decomposition diagnostic route.

Usage

```
select_decomposition_route_samples(route = NULL, inputs = NULL)
```

Arguments

- route One-row route data frame or named list from ‘build_decomposition_diagnostic_routes()’.
- inputs List returned by ‘load_decomposition_diagnostic_inputs()’.

Value

Data frame with ‘dataset_name’, ‘age’, and ‘.row_name’.
