select_sjsdm_cv_calibration_representatives
<i>Select sjSDM CV Calibration Representatives</i>

Description

Deterministically selects median- and maximum-complexity spatial units, historical fitting outliers, and every supplied paleo temporal profile.

Usage

```
select_sjsdm_cv_calibration_representatives(data_units = NULL)
```

Arguments

data_units	Unit inventory with analysis, grouping, complexity-count, historical-budget, and temporal indicator columns.
------------	--

Value

Selected unit rows with 'complexity_score' and semicolon-delimited 'selection_reason'.

Examples

```
## Not run:  
select_sjsdm_cv_calibration_representatives(data_units)  
  
## End(Not run)
```
