summarise_predictive_decomposition
Summarize Predictive Decomposition Shares

Description

Summarizes fold-level predictive decomposition shares with median and 95 percent intervals.

Usage

```
summarise_predictive_decomposition(data_shares)
```

Arguments

`data_shares` Data frame returned by `'compute_predictive_decomposition_shares()'`. Must contain `'component'`, `'share'`, and `'defined'` columns.

Value

A tibble with one row per component.
