summarise_sjsdm_tuning_timings
Collect sjSDM Tuning Stage Timings

Description

Converts compact fold prediction caches into a long timing table for fold preparation, fitting, prediction, and scoring stages.

Usage

```
summarise_sjsdm_tuning_timings(list_prediction_cache = NULL)
```

Arguments

`list_prediction_cache`
Fold caches returned by `[run_sjsdm_tuning_candidates()]` when prediction caching is enabled.

Value

Long tibble with repeat, fold, optional candidate, stage, elapsed seconds, and execution status.

Examples

```
## Not run:  
summarise_sjsdm_tuning_timings(list_sjsdm_tuning_prediction_cache)  
  
## End(Not run)
```
