| <i>Validate the cross validation design Payload</i> |

---

## Description

Applies the artifact-specific registered payload contract.

## Usage

```
validate_cross_validation_design_payload(payload = NULL)
```

## Arguments

|         |                         |
|---------|-------------------------|
| payload | Named artifact payload. |
|---------|-------------------------|

## Value

Invisible 'TRUE'; invalid payloads abort.
