load_sjsdm_cv_payload_field
Load an sjSDM CV Payload Field

Description

Reads and validates one canonical native-v2 artifact.

Usage

```
load_sjsdm_cv_payload_field(  
  store_path = NULL,  
  v2_target_name = NULL,  
  artifact_type = NULL,  
  payload_name = NULL,  
  read_target_function = targets::tar_read_raw  
)
```

Arguments

store_path Targets store path.
v2_target_name Canonical v2 target name.
artifact_type Expected v2 artifact type.
payload_name Payload field to return.
read_target_function
 Injectable target reader.

Value

The requested v2 payload field.
