validate_trait_review_decisions
<i>Validate Trait Review Decisions</i>

Description

Validates review schema, human approval, candidate coverage, selectors, and correction-rule conflicts against current trait records.

Usage

```
validate_trait_review_decisions(  
  data_trait_review_decisions,  
  data_trait_records,  
  data_trait_review_candidates,  
  data_trait_source_scale_record_audit = NULL  
)
```

Arguments

`data_trait_review_decisions`
Decision data loaded by [load_trait_review_decisions()].

`data_trait_records`
Current trait records for the review stage.

`data_trait_review_candidates`
Current candidates from [build_trait_review_candidates()].

`data_trait_source_scale_record_audit`
Optional record-level audit from [apply_trait_source_scale_rules()].

Value

A tibble containing validated review decisions.
