diagnose_colocated_community_records
<i>Diagnose Colocated Community Records</i>

Description

Returns same-coordinate, same-age community colocations with source-prefix and community-signature flags.

Usage

```
diagnose_colocated_community_records(  
  data_community = NULL,  
  data_coordinates = NULL  
)
```

Arguments

data_community A long-format community data frame with ‘dataset_name’, ‘sample_name’, ‘age’, ‘taxon’, and ‘pollen_count’ columns.

data_coordinates A coordinate data frame with dataset names in a ‘dataset_name’ column or row names and ‘coord_long’, ‘coord_lat’ columns.

Value

A tibble with one row per colocated group and diagnostic flags used by modern preprocessing.
