add_dataset_name_column_from_rownames
<i>Add Dataset Name Column from Row Names</i>

Description

Adds a 'dataset_name' column to a data frame by extracting dataset names from row names.

Usage

```
add_dataset_name_column_from_rownames(data)
```

Arguments

data	A data frame with row names in the format "dataset__something".
------	---

Value

The input data frame with an added 'dataset_name' column.
