Combine sjSDM Tuning Work Items

Description

Combines granular candidate/fold results into the established tuning table and fold-organized compact prediction cache.

Usage

```
aggregate_sjsdm_tuning_work_items(list_work_item_results = NULL)
```

Arguments

`list_work_item_results` List of results from [run_sjsdm_tuning_work_item()].

Value

Named list with 'data_tuning' and 'list_prediction_cache', matching the rich return contract of [run_sjsdm_tuning_candidates()].
