Apply Trait Source Scale Rules

Description

Applies approved whole-source scaling rules once and records each changed trait value with its stable VegVault identifiers.

Usage

```
apply_trait_source_scale_rules(
  data_trait_records,
  data_trait_source_scale_rules
)
```

Arguments

`data_trait_records`	Untouched trait records containing source and record identifiers.
`data_trait_source_scale_rules`	Validated source-scale rules.

Value

A named list with source-scaled records and rule- and record-level audits.
