Build sjSDM Artifact Provenance

Description

Constructs the common one-row provenance contract for native-v2 cross-validation artifacts.

Usage

```
build_sjsdm_artifact_provenance(
  pipeline_id = NULL,
  configuration_profile = NULL,
  created_at = base::Sys.time(),
  stable_provenance = base::list()
)
```

Arguments

`pipeline_id`	Pipeline identifier.
`configuration_profile`	Active configuration profile.
`created_at`	Finite artifact creation time.
`stable_provenance`	Optional named list of stable scientific fields.

Value

One-row provenance tibble.
