Build a surgical sjSDM CV invalidation manifest

Description

Build a surgical sjSDM CV invalidation manifest

Usage

```
build_sjsdm_cv_invalidation_manifest(
  data_continental_audit,
  regional_store_root = NULL,
  regional_units = base::c("eu_r001", "eu_r002"),
  regional_tier_store = NULL
)
```

Arguments

`data_continental_audit`	Completed continental retention audit.
`regional_store_root`	Optional paleo regional target-store root.
`regional_units`	Regional units whose partial CV state must be reset.
`regional_tier_store`	Optional paleo regional tier-tuning store.

Value

A tibble with one row per target selected for invalidation.
