Build an sjSDM Tuning Round Plan

Description

Constructs the deterministic exhaustive or cumulative staged orchestration plan. Staged execution preserves the optimized three-round 8 to 4 to 2 policy encoded by the tuning schedule.

Usage

```
build_sjsdm_tuning_round_plan(tuning_strategy = NULL, n_rounds = NULL)
```

Arguments

`tuning_strategy`	'exhaustive' or 'staged'.
`n_rounds`	Configured positive round count. Staged execution requires three rounds.

Value

Tibble with round identifiers, final-round flags, and tier target names.
