Build Grouped Trait Review Investigation

Description

Resolves investigated candidates without source-level support to approved no-action decisions. Candidates affected by proposed source-scale rules remain pending; candidates covered by approved source rules are closed as requiring no additional taxon-specific action.

Usage

```
build_trait_review_grouped_investigation(
  data_trait_review_exceptions,
  data_candidate_source_memberships,
  data_source_scale_proposals,
  reviewer,
  reviewed_at,
  evidence_reference
)
```

Arguments

`data_trait_review_exceptions`	Unresolved review candidates.
`data_candidate_source_memberships`	Candidate-to-source memberships.
`data_source_scale_proposals`	Proposed or approved source-scale rules.
`reviewer`	Name of the approving human reviewer.
`reviewed_at`	ISO review date.
`evidence_reference`	Path to the durable investigation report.

Value

A named list containing the investigation audit, approved no-action decisions, pending candidates, and an outcome summary.
