Compute the Shared Spatial MEM Basis

Description

Applies the common spatial-predictor configuration and constructs the reusable 2-D MEM basis when spatial predictors are enabled.

Usage

```
compute_shared_spatial_mev_basis(
  data_coords_projected,
  config_spatial_predictors,
  compute_basis_function = compute_spatial_mev_basis
)
```

Arguments

`data_coords_projected`	Projected input coordinates.
`config_spatial_predictors`	Shared spatial-predictor configuration.
`compute_basis_function`	Basis constructor. Defaults to [compute_spatial_mev_basis()].

Value

Reusable spatial MEM basis list, or 'NULL' when 2-D spatial predictors are disabled.
