Diagnose Duplicate Modern Sites

Description

Returns modern datasets that share the same geographic coordinates.

Usage

```
diagnose_duplicate_sites(data_coordinates = NULL)
```

Arguments

`data_coordinates`	A data frame with 'coord_long' and 'coord_lat' columns. Dataset names may be stored either in a 'dataset_name' column or in row names.

Value

A tibble with one row per dataset involved in a duplicated coordinate group. Returns a zero-row tibble when no duplicate sites are detected.
