Diagnose Modern Data Impossible Values

Description

Returns modern community and coordinate values that are impossible before modelling.

Usage

```
diagnose_modern_data_impossible_values(
  data_community = NULL,
  data_coordinates = NULL
)
```

Arguments

`data_community`	A long-format community data frame with 'dataset_name', 'sample_name', 'age', 'taxon', and 'pollen_count' columns.
`data_coordinates`	A coordinate data frame with 'coord_long' and 'coord_lat' columns. Dataset names may be stored either in a 'dataset_name' column or row names.

Value

A tibble describing impossible values. Returns a zero-row tibble when no impossible values are detected.
