Evaluate Modern Data Quality

Description

Evaluates modern community preprocessing and returns a compact QA report.

Usage

```
evaluate_modern_data_quality(
  data_community = NULL,
  data_sample_ages = NULL,
  data_coordinates = NULL,
  flag_abort_on_impossible_values = TRUE
)
```

Arguments

`data_community`	A long-format community data frame with 'dataset_name', 'sample_name', 'age', 'taxon', and 'pollen_count' columns.
`data_sample_ages`	A sample-age data frame with 'dataset_name', 'sample_name', and 'age' columns.
`data_coordinates`	A coordinate data frame with dataset names in a 'dataset_name' column or row names.
`flag_abort_on_impossible_values`	Logical. If 'TRUE' (default), impossible values abort the QA gate.

Value

A named list containing duplicate-site, duplicate-community, duplicate-key, impossible-value, and summary tables.
