Evaluate sjSDM CV Repeat Confirmation

Description

Determines whether a provisional repeat-one candidate is confirmed by repeat two either as the exact winner or as a practically equivalent candidate within a registered relative loss tolerance.

Usage

```
evaluate_sjsdm_cv_repeat_confirmation(
  data_candidate_summary = NULL,
  provisional_candidate_id = NULL,
  relative_loss_tolerance = 0.02
)
```

Arguments

`data_candidate_summary`	Candidate-level summary containing 'repeat_id', 'candidate_id', 'candidate_loss', and 'candidate_complete'.
`provisional_candidate_id`	Character scalar identifying the repeat-one provisional winner.
`relative_loss_tolerance`	Non-negative relative loss gap allowed above the repeat-two minimum.

Value

One-row tibble containing the repeat-two winner, exact-winner flag, relative loss gap, tolerance, practical-equivalence flag, and confirmation.
