Extract an Optional Spatial MEM Basis Component

Description

Extracts one explicit component from a reusable spatial MEM basis while preserving 'NULL' when the basis is disabled.

Usage

```
extract_spatial_mev_basis_component(list_spatial_mev_basis, component_name)
```

Arguments

`list_spatial_mev_basis`	Reusable spatial MEM basis list or 'NULL'.
`component_name`	Character scalar naming the component to extract.

Value

Selected component or 'NULL'.
