Load Decomposition Diagnostic Inputs

Description

Loads upstream targets needed by the decomposition diagnostic framework.

Usage

```
load_decomposition_diagnostic_inputs(
  store_path,
  resolution_id = "genus",
  tar_read_fn = targets::tar_read_raw
)
```

Arguments

`store_path`	Targets store path.
`resolution_id`	Taxonomic resolution suffix. Default is '"genus"'.
`tar_read_fn`	Function used to read targets. Defaults to 'targets::tar_read_raw()'.

Value

Named list with upstream data and configuration objects.
