Load Decomposition Model-Fitting Configuration

Description

Internal loader that prefers the shared configuration target and falls back to the taxonomic-resolution-specific target.

Usage

```
.load_decomposition_model_fitting_config(
  store_path,
  resolution_id,
  tar_read_fn
)
```

Arguments

`store_path`	Targets store path.
`resolution_id`	Taxonomic resolution suffix.
`tar_read_fn`	Function used to read targets.

Value

The model-fitting configuration value.
