Load Targets Store Metadata

Description

Reads target name and error metadata from one targets store. If the metadata cannot be read, 'NULL' is returned.

Usage

```
load_targets_store_metadata(
  store_path,
  meta_fn = targets::tar_meta,
  fields = base::c("name", "error")
)
```

Arguments

`store_path`	A single character string with the targets store path.
`meta_fn`	Function used to read metadata. Defaults to [targets::tar_meta()].
`fields`	Non-empty character vector of metadata fields to request.

Value

A metadata data frame, or 'NULL' if metadata cannot be read.

Examples

```
## Not run:
load_targets_store_metadata(
  store_path = "Data/targets/modern_spatial_continental/europe"
)

## End(Not run)
```
