Load Target Fingerprints from a Targets Store

Description

Reads and validates content hashes for exact target names in an external 'targets' store. The function fails closed when metadata are unavailable, incomplete, duplicated, errored, or unhashed.

Usage

```
load_targets_target_fingerprints(
  store_path,
  target_names,
  meta_fn = targets::tar_meta
)
```

Arguments

`store_path`	A single non-empty character string with the targets store path.
`target_names`	A character vector of unique, non-empty target names.
`meta_fn`	Function used to read metadata. Defaults to [targets::tar_meta()].

Value

A tibble with 'name' and 'data_hash', ordered by 'name'.

Examples

```
## Not run:
load_targets_target_fingerprints(
  store_path = "Data/targets/traits_reference/pipeline_traits_reference",
  target_names = c(
    "data_traits_classified_corrected",
    "data_combined_classification_table_traits"
  )
```

```
)

## End(Not run)
```
