Prepare the sjSDM Response and Error Family

Description

Internal helper that preserves the response preparation performed by 'fit_jsdm_model()'.

Usage

```
.prepare_sjsdm_response(
  data_community = NULL,
  error_family = c("gaussian", "binomial")
)
```

Arguments

`data_community`	Community response matrix.
`error_family`	Selected error-family name.

Value

Named list containing the prepared community matrix and family.
