Run or Reuse One Content-Matched Sensitivity Phase

Description

Evaluates a lazy phase expression and atomically saves successful results.

Usage

```
run_sjsdm_sensitivity_checkpoint(
  expr,
  path_checkpoint = NULL,
  signature,
  phase,
  verbose = TRUE
)
```

Arguments

`expr`	Lazy expression evaluated only on a cache miss.
`path_checkpoint`	Optional directory for immutable RDS checkpoints.
`signature`	Content signature including upstream scientific inputs.
`phase`	Character phase identifier used in filenames and messages.
`verbose`	Logical; print timestamped phase and reuse messages.

Details

Errors and interrupted temporary files are never accepted as results.

Value

The computed or previously saved phase result.

Examples

```
run_sjsdm_sensitivity_checkpoint(
  expr = 42L,
  signature = "example_inputs",
  phase = "fit",
  verbose = FALSE
)
```
