Save Pipeline Progress Visualisation

Description

Builds pipeline progress visualisations and saves HTML and PNG artifacts.

Usage

```
save_pipeline_progress_visualisation(
  sel_script,
  sel_store = load_active_config_value("target_store"),
  output_file = "project_status",
  output_dir = here::here("Documentation/Progress"),
  background_color = "#141B22",
  physics = TRUE,
  level_separation = 250,
  plot_function = plot_pipeline_progress_visualisations
)
```

Arguments

`sel_script`	Pipeline script passed to [plot_pipeline_progress_visualisations()].
`sel_store`	Path to the targets store directory.
`output_file`	Base name for output files.
`output_dir`	Root directory for progress artifacts.
`background_color`	Background colour used for saved HTML widgets.
`physics`	Logical indicating whether network physics are enabled initially.
`level_separation`	Numeric separation between network levels.

`plot_function` Injectable progress-plot builder used for isolated side-effect tests.

Details

Browser-backed PNG export is best effort. A PNG failure emits a warning and leaves the two HTML outputs available to the caller.

Value

Named character vector containing paths written successfully.
