Summarize Decomposition Diagnostic Routes

Description

Computes fold-level shares and route-level summaries from variant metrics produced by 'run_decomposition_diagnostic_folds()'.

Usage

```
summarise_decomposition_diagnostic_routes(variant_metrics = NULL)
```

Arguments

`variant_metrics`	Data frame with route, fold, variant, status, and loss columns.

Value

Named list with 'data_fold_shares' and 'data_route_summary'.
