Validate Trait Source Scale Rules

Description

Fails closed unless source-scale rules match the active VegVault version, source metadata, selectors, and expected record counts exactly.

Usage

```
validate_trait_source_scale_rules(
  data_trait_source_scale_rules,
  data_trait_records,
  path_vegvault
)
```

Arguments

`data_trait_source_scale_rules`	Rules loaded by [load_trait_source_scale_rules()].
`data_trait_records`	Untouched extracted trait records containing 'data_source_id'.
`path_vegvault`	Character scalar path to the VegVault SQLite database.

Value

The validated source-scale rule tibble.
