convert_v1_sjsdm_tier_tuning_artifact
Convert a v1 sjsdm tier tuning Artifact

Description

Applies the frozen v1 fixture contract and upgrades an assembled payload to the canonical ‘sjsdm_tier_tuning’ v2 envelope.

Usage

```
convert_v1_sjsdm_tier_tuning_artifact(  
  payload = NULL,  
  pipeline_id = NULL,  
  configuration_profile = NULL,  
  created_at = base::Sys.time(),  
  v1_schema_hash = "2d727fd54623501e0ac384e0674c17f3"  
)
```

Arguments

payload	Exact named v2 payload assembled from frozen v1 targets.
pipeline_id	Source pipeline identifier.
configuration_profile	Source configuration profile.
created_at	Conversion time.
v1_schema_hash	Frozen v1 schema-fixture hash.

Value

Validated migrated v2 artifact envelope.
