load_sjsdm_versioned_artifact
<i>Load a Versioned sjSDM Artifact</i>

Description

Reads the canonical v2 target first and falls back to a documented v1 target group that is upgraded by a pure converter.

Usage

```
load_sjsdm_versioned_artifact(  
  store_path = NULL,  
  v2_target_name = NULL,  
  v1_target_names = NULL,  
  artifact_type = NULL,  
  converter_function = NULL,  
  read_target_function = targets::tar_read_raw  
)
```

Arguments

store_path	Targets store path.
v2_target_name	Canonical v2 target name.
v1_target_names	Documented v1 target names.
artifact_type	Expected artifact type.
converter_function	Function accepting the named v1 target bundle.
read_target_function	Injectable target reader.

2

load_sjsdm_versioned_artifact

Value

Validated native or converted v2 artifact.
